

Graded Task #2 (GT2): Computing Sales Commissions Using Functions

Compro

USER REQUIREMENTS:

1. Create a new project and name it **gt2_<section>-<lastname>**
2. Use the **functions** with parameter passing in accomplishing this task.
3. Create two functions: agentInfo() and computeComm()
4. The agentInfo() function should accept the following information from the calling function: first name, last name, middle name, department.
5. The computeComm() function should accept the sales from the calling function to compute the corresponding commission.
6. The commission is computed based on the following:

Sales	Commission
< 5000	Php850
5001 – 15000	Php1250 + 8% of the sales
>15000	Php1700 + 15% of the sales

7. See sample output below.

SAMPLE OUTPUT:

```
Enter first name: Aaron
Enter last name: Vergara
Enter middle name: Mendoza
Enter department: CS

Enter sales: 4500.00

Name: Vergara, Aaron Mendoza
Commission Rate: Php850.00
```
